The aim is to work out different areas on the topic:
- gender paygap
- women in science
- women in resistance, etc.
-> exhibition of the results

Impact

sensitise the students

« A faire »

It is important to be prepared for any discussions that may arise for religious and cultural reasons. In our context, the project only works if enough colleagues in their specialist departments participate. That way, the new knowledge is more broadly diversified.

« Ne pas faire »

Not working alone, this ensures interdisciplinary education and visualisation of results.
